## pandas.plotting

Marquez, Keith Leigh Zhen R.

subpackage Pandas provides some extra plotting functions for a few select plot types.

#### About the Data

In this notebook, we will be working with Facebook's stock price throughout 2018

### Setup

```
%matplotlib inline
import matplotlib.pyplot as plt
import numpy as np
import pandas as pd
fb = pd.read_csv(
    '/content/fb_stock_prices_2018.csv', index_col='date', parse_dates=True
    )
```

#### Scatter matrix

```
# Importing scatter_matrix function from pandas.plotting
from pandas.plotting import scatter_matrix
# Creating a scatter matrix plot for the Facebook stock data
scatter_matrix(fb, figsize=(10, 10))
```

```
array([[<Axes: xlabel='open', ylabel='open'>,
         <Axes: xlabel='high', ylabel='open'>,
         <Axes: xlabel='low', ylabel='open'>,
<Axes: xlabel='close', ylabel='open'>,
<Axes: xlabel='volume', ylabel='open'>],
        <Axes: xlabel='low', ylabel='high'>,
         <Axes: xlabel='close', ylabel='high'>,
<Axes: xlabel='volume', ylabel='high'>],
        <Axes: xlabel='low', ylabel='low'>,
         <Axes: xlabel='close', ylabel='low'>,
<Axes: xlabel='volume', ylabel='low'>],
        [<Axes: xlabel='open', ylabel='close'>,
         <Axes: xlabel='high', ylabel='close'>,
         <Axes: xlabel='low', ylabel='close'>,
         <Axes: xlabel='close', ylabel='close'>, <Axes: xlabel='volume', ylabel='close'>],
        [<Axes: xlabel='open', ylabel='volume'>,
         <Axes: xlabel='high', ylabel='volume'>,
         <Axes: xlabel='low', ylabel='volume'>,
         <Axes: xlabel='close', ylabel='volume'>,
         <Axes: xlabel='volume', ylabel='volume'>]], dtype=object)

                                                                                                                        1.0
                                                                                                                   volume
                                                                                                                               1e8
                   open
                                            high
                                                                    low
                                                                                            close
```

Changing the diagonal from histograms to KDE:

```
scatter_matrix(fb, figsize=(10, 10), diagonal='kde')
# Creating a scatter matrix plot with KDE on the diagonal for the Facebook stock data
```

```
array([[<Axes: xlabel='open', ylabel='open'>,
          <Axes: xlabel='high', ylabel='open'>,
          <Axes: xlabel='low', ylabel='open'>,
<Axes: xlabel='close', ylabel='open'>,
<Axes: xlabel='volume', ylabel='open'>],
        <Axes: xlabel='low', ylabel='high'>,
          <Axes: xlabel='close', ylabel='high'>,
<Axes: xlabel='volume', ylabel='high'>],
        (<Axes: xlabel='open', ylabel='low'>,
  <Axes: xlabel='high', ylabel='low'>,
          <Axes: xlabel='low', ylabel='low'>,
          <Axes: xlabel='close', ylabel='low'>,
<Axes: xlabel='volume', ylabel='low'>],
         [<Axes: xlabel='open', ylabel='close'>,
          <Axes: xlabel='high', ylabel='close'>,
          <Axes: xlabel='low', ylabel='close'>,
          <Axes: xlabel='close', ylabel='close'>,
<Axes: xlabel='volume', ylabel='close'>],
         [<Axes: xlabel='open', ylabel='volume'>,
          <Axes: xlabel='high', ylabel='volume'>,
          <Axes: xlabel='low', ylabel='volume'>,
          <Axes: xlabel='close', ylabel='volume'>,
          <Axes: xlabel='volume', ylabel='volume'>]], dtype=object)

                                                                                                                            volume
                                                                                                                                         1e8
                    open
                                               high
                                                                          low
                                                                                                   close
```

## Lag plot

Lag plots let us see how the variable correlations with past observations of itself. Random data has no pattern:

from pandas.plotting import lag\_plot
np.random.seed(0) # make this repeatable
lag\_plot(pd.Series(np.random.random(size=200)))

<Axes: xlabel='y(t)', ylabel='y(t + 1)'>

1.0

0.8

0.6

0.2

0.0

0.0

0.2

0.4

0.6

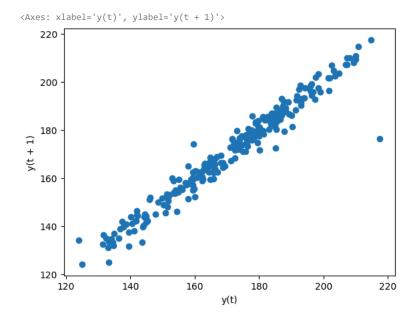

0.8

1.0

y(t)

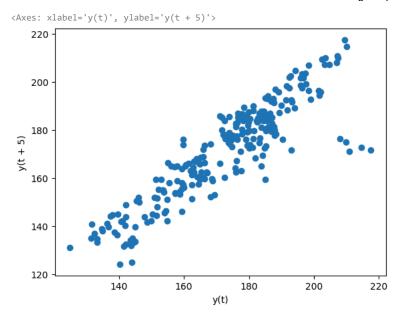

Data with some level of correlation to itself (autocorrelation) may have patterns. Stock prices are highly auto-correlated:

lag\_plot(fb.close)

The default lag is 1, but we can alter this with the lag parameter. Let's look at a 5 day lag (a week of trading activity):

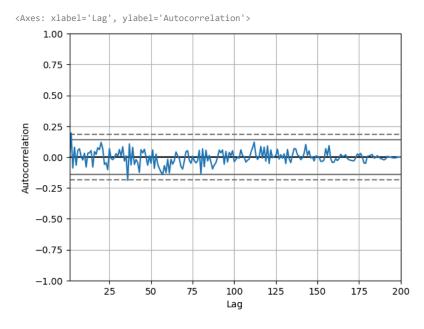

lag\_plot(fb.close, lag=5)

# Autocorrelation plots

We can use the autocorrelation plot to see if this relationship may be meaningful or just noise. Random data will not have any significant autocorrelation (it stays within the bounds below):

from pandas.plotting import autocorrelation\_plot
np.random.seed(0) # make this repeatable
autocorrelation\_plot(pd.Series(np.random.random(size=200)))

Stock data, on the other hand, does have significant autocorrelation:

 $\verb|autocorrelation_plot(fb.close)|\\$
